# Simple Insurance Company Management System

CSYE6220 | Final Project| Yanping Fu – 001569536

This system is used to manage clients' insurance and claims in an easier way. Users of this system include clients, employees, and administrators.

**Administrator**

- Add/modify/remove new employee and his/her information
- Admin page to display current employees and clients

**Employee**

- Processing client's insurance claim (update claims status)
- Can access the insurance policy info of the claim which is being processed by this employee

**Client**

- Register a user account
- Modify account information
- Buy insurance, view insurance policy, and update insurance policy setting
- Submit insurance claims and track status changing
